

GENESIS

A Proven AI Marketing Model

→ **Genesis:** A proven model for effective brand growth and building a massive audience. AI enables us to bring this model to you faster than any competitor. This model requires us to move fast with a standardized set of deliverables that all work in intricate tandem to get you targeted reach and calculated results.

This is a *very* streamlined and optimized process and product, with a single goal; an audience that becomes the fuel to your organic growth and eliminates dependence on paid ads. **Our model can run in tandem to any current marketing efforts you're undertaking.**

The model works by boosting your authority across social networks and Google search results, which increases traffic to your high conversion page (which we call an HCP), which is built to turn traffic into leads. For this model to work our goal is to get you 1 million in guaranteed social media reach within the first 90-120 days, then an average of 1 million a month after.

[Watch the video version of the deliverable explanation.](#)

Deliverables

Digital Deliverables:

These deliverables are designed for a SINGLE brand, audience and offering/product. If they have 2 offerings/products they'd like to pitch, we build a second set of deliverables and automated funnel. *This can be done at a discount.*

- High Conversion Page (HCP)
 - Built to convert by pitching one offer or service from your brand, with a catch all using your lead magnet. Mapped as a subdomain

(like [sub].yourdomain.com) so there's no effect on your current marketing efforts fueling your business today.

- SEO Researched Keywords
 - This drives your SEO strategy and your blog content to compete with larger brands in your industry.
- SEO Blogs (20 blogs per month)
 - This drives organic traffic from search engines to your HCP. This also helps improve your root domains SEO as well.
- eBook lead magnet
 - Captures people not quite ready for your service or offer and builds a long term sustainable audience with email marketing.
- Social Media Content & Management (a post a day)
 - Our context driven AI system creates content that will capture your audience, build your brand, and educate your prospects.
- Lead Nurture email series
 - Keeps your brand front and center in prospects' inboxes.

Conversion Elements:

- Generic Viral Reels & CollabStitch
 - To achieve the 1M in organic reach, we use generic viral reels that have a history of doing 200k+ in views and collab post these with your social accounts and our 40M in followers across our network. At the end of each Viral Reel is a custom branded call to action that drives people to interact with your brand.
- Remarketing Ads (FB/Instagram)
 - When your social accounts reach 1 million people a month it positions your brand as an authority, and gives you the opportunity to re-market to that audience for pennies compared to traditional marketing efforts. **This narrows your massive audience into targeted traffic.**
- Meta DM Bot
 - Actively reaches out to the audience that interacts with your content to drive targeted traffic from the generic viral reels to your HCP.

Available Addons:

- Paid Awareness Ads

- For businesses that want to push the limits on all platforms, a paid awareness campaign will supplement your lead flow while the organic funnel is getting off the ground.
- Rebrand & Style Guide
 - For companies with outdated brands that need a refresh!
- Custom website design
 - Already have a website and need us to manage and create changes for you? We have a dedicated team able to handle these changes in addition
- 5M in monthly organic reach
 - Need a larger reach? We can supply up to 5M in guaranteed social audiences after the first 120 days.
- Branded viral video reels
 - Our team of creative experts will film custom viral reels for your brand that cause your audience to engage with and enjoy your content like never before.
- Dedicated project manager
 - Want to guarantee results? Our dedicated project managers will work with your brand to ensure the highest level of results possible, optimizing your funnel piece by piece until you have an automated lead generation engine to grow your brand for years to come.
- Second offering or product under the same brand
 - Have another offer you'd like to pitch under the same brand? It requires a different set of deliverables, but you can do this at a discounted rate of \$300/mo.
 - A separate brand needs a separate subscription and is treated as a separate company, discounts per multiple companies are up to the sales dept's discretion.

Facebook ads vs. retargeting: facebook retargeting, which is what is offered in our core package, is the process of marketing ads to your 1 million in monthly reach that interact with your brand. This is different than what most people call "facebook ads" which is really awareness ads, that are targeting a new fresh audience using facebook/meta advertising, this is offered as an addon.

HCP vs Website Design: an HCP is not not a traditional website, it is more of a lead page mapped to their sub domain ([sub].domain.com) and has no effect on their current site. A "website" evokes a custom build, multi-page website with pages like about us, services, etc, etc.

The issue is most websites are confusing for consumers and have far too many objectives, which is why we use a single goal across your marketing that is easy to grasp and satisfies your customers dream outcome.

We DO design full websites, as a website management addon.

Deliverables & Results Timeline: results such as the one million in reach can take up to 120 days to see, and the expectation should be that this is a long term strategy, not a quick solution. We will show customers all of their deliverables within 14 days, then begin their marketing efforts to drive the 1M in monthly organic reach and the retargeting ads.

→What we DO NOT do:

Through the year we have evolved as a company and changed from a “unlimited/full service” marketing company to a very specialized and meticulous marketing model that we build for the customer. This means we must paint expectations that our specialized process will yield results for the customer above their current marketing efforts, with a goal to replace those efforts. To do this, they follow OUR model. If they have marketing tools and efforts already, they can keep going on that, and still reap the benefits of our funnel’s results.

We do not:

1. Use 3rd party marketing platforms provided by the client
2. Manage Facebook ads for most customers, unless they have paid for the management service, which is an addon.
3. Manage their website or build them a full website, unless they have paid for the website management addon.
4. Build a funnel for 2 products/offerings/audiences into the same funnel. We build ONE automated marketing funnel for ONE brand, per subscription. They can also add a second offering/product for a lower fee from our addon options.

Genesis Deliverables Descriptions

SEO Optimized Keywords:

- We research the highest volume and easiest to rank keywords that your audience is searching. The most bang for your buck to get you moving towards those first pages of Google ASAP. We create a list of the possible Keywords to target heavily - if you have time, we offer you the opportunity to select the top 10-20 that match the target you are most looking for us to focus on. If time is of the essence, we can select these for you. These keywords drive your High Conversion Page and they are aggressively used in the

SEO-optimized blogs to drive organic search traffic to your HCP. It's important to note that SEO is a long game, and can take 3-6 months to start seeing significant traffic

Lead Magnet (eBook or Coupon):

- If you have a good lead magnet or eBook that targets a *single* goal that aligns with the HCP, then we can use it. If not, we'll create an eBook using your context database, or depending on your industry, use a coupon. We use this to give something valuable away for free, as research-driven results show it leads to increased effectiveness and engagement and builds your MailChimp audience. Your target audience hits the download button, enters their email and name, and receives an email with the downloadable content. This then triggers your lead nurture email series.

Lead Nurture Emails:

- After giving their email above, an automated email delivers the promised ebook or coupon, initiating a specialized 24-day email lead nurture series. This series provides valuable and engaging information tailored to your target audience, ensuring sustained interest and engagement, and is designed to work with the new strict Google anti-spam rules.

Social Media

- By utilizing specialized viral collaboration from high-traffic properties and accounts, we drive a substantial amount of audience engagement to your sites and brand. Guaranteed 1 MILLION within the first 120 days, and an average of 1M a month after.

Using specialized AI and human components, we create and post unique content that matches your brand and educates your audience. Content is posted every day, of every week, of every month.. This is linked to your HCP site through a specialized call to actions in your social media bio. Specifically, each week this looks like:

- 6 static posts
 - 2 Inspirational quotes
 - 1 Fun fact
 - 1 Benefits & Feature on your brand
 - 1 Call to action
 - 1 Educational carousel related to your product or service
- 1 generic viral collaborative video (collaborated with an account within our network)
 - This *does not* have anything to do with your brand, it *does* have a branded CTA stitched to the end of it. But it is the secret to reaching

millions in monthly audience. We only use videos that are *proven* to go viral.

HCP

- To ensure the absolute best conversion rate, we create a prospect-facing “HCP” (or high-conversion page). This optimized page is designed to maximize conversions and create an efficient and effective web presence to drive your organic audience to. This is not a traditional website, most websites are confusing for consumers and have far too many objectives, which is why we use a single goal across your marketing that is easy to grasp and satisfies your customers dream outcome.

Your HCP will be mapped to what’s called a “sub domain” meaning it does not have an affect on your current website, as to not hurt any current lead flow. A sub domain is a preface to your root domain like start.yourdomain.com or hello.yourdomain.com. But don’t worry, your root domain will still benefit from the added traffic and SEO.

It is streamlined and laid out with the most modern and statistically driven highest conversion sections:

- **Main pitch:** Catchy why they should choose you and how your offer, product, or service ties to their dream outcome.
- **Calls to action:** Short, personal, specific action you want them to take.
- **Core benefits:** Your 4 short, catchy core benefits that promote your value proposition
- **Pitch:** Summary of your core pitch in a bit more detail then the catchy main pitch, their dream outcome, your offer - basically your core focus in a fun and engaging manner. Why they should choose you.
- **Process:** How they can take advantage of your offer or service. The steps they’ll want to take. Short and sweet.
- **Reviews:** (if you have them) What others who took advantage of your offer have to say. Powerful for evoking a feeling of confidence, anticipation, safety, and trust.
- **Contact form:** A section with a contact you form that sends the responses to the specified email you’d like and automatically links to Mailchimp to build your audience.
- **About:** We add a short summary of the story of your business and encapsulate why you do what you do
- **FAQ:** A few commonly asked questions. We use this to give a bit more detail in bite size, easily digestible chunks.

- **Ending call to action:** A powerful, attention-grabbing call to action driving your core focus
- **Sticky lead magnet footer:** This pops up as users scroll and have a link to download your ebook or coupon. We can use one of yours or create one for you. We use this to give something valuable away for free, such as information or a promotional offer, as it leads to increased effectiveness and engagement.
 - After they hit the download button, it asks for their name and email to send them an email containing the download (gathering your MailChimp audience and triggering the start of the 24-email lead nurture series).
 - Then they get popped over to an **Optimized Thank You Page:** proven to boost conversions by approximately 60%. This page re- encourages the desired action, such as booking a call.
- **Footer:** This has your social media account links and such to tie those deliverables together and allow your audience to explore your brand more.
- **Blogs:** A list of your specialized, SEO-laden blogs (see below) with valuable information for your target audience but working on SEO boosting like crazy in the background.
- ***Note:** we unfortunately cannot and do NOT offer a full-blown or customized website on this package. Customized websites are on the Enterprise package.

SEO- Optimized Blogs:

- We publish detailed contextual blog articles, filled with specialized, researched SEO keywords. These are specially designed to target the keywords you approved and want to rank for, improving your visibility in Google search results - helping get your site on the first page for your targeted audience. Please note, these are not newsletter or educational type blogs - they are targeted and super effective at boosting your SEO in the background.
 - We add 20 new pages each month, to hammer those keywords and ensure your site remains relevant and continues to improve in search rankings, driving more organic traffic to your lead page.

Branding:

- Branding often delays the other deliverables by a month or more - so we do things differently than other marketing companies. Most will focus on your brand and appearances first - we don't blame them as that's the fun bit! BUT...it doesn't actually

affect your results much. And the main frustrations clients have with most marketing companies is not being able to get reach, audience, RESULTS.

So, we've designed our system to flip that order deliberately. We take whatever branding you currently have (if you don't have anything, we quickly whip you up something as a placeholder) and we ROLL. AFTER you start getting results - then we come back, optimize, and get you a rebrand if you'd like it.

Remarketing Paid Ads:

- For this model to work, we highly recommend you use Paid Remarketing (Facebook Ads, Instagram Ads) to retarget visitors who have interacted with your brand but haven't converted yet. Showcase products they viewed, offer discounts and highlight positive reviews to encourage reconsideration.

We start these around 1 month in, after your deliverables are up and running and have had some time to start churning. You'll want to allocate ~\$500/month or more for these initially as retargeting is designed to work together with the other components of your package in a intricate and beautiful way to drive you reach. Eventually, the goal is to phase all paid ads out. The 1 Mil in reach is actually CRAZY effective, ALREADY included in your subscription- we cover it complimentary for you as results mean that much to us- and often can TAKE THE PLACE OF paid ads for most businesses. Saving you THOUSANDS a month.

Next Up

1. Welcome Email

- Onboarding Form:** getting information from you on your specific business, goal, what ONE thing you'd like us to market and drive audience too (this is really critical as we need the ONE objective/ tangible action you want your audience taking - ie "Book a call", "Schedule an appointment", "Buy this book", "Order custom stamps").
- ~~**Accounts & Assets Form:** the team will need these specific decisions and assets from you to create your deliverables:~~
 - ~~A guide to create and link the accounts we'll need for your business to get you up and running (you'll go through this FIRST) (*Note in order to get you that reach and audience we 100% require a Business Facebook and Business Instagram)~~
- Create Account in The Navigator:** this gets you setup on our dashboard for your communications and deliverables.

- d. **Scheduling link:** schedule a call with our Onboarding Expert to answer any questions, finalize getting accounts connected, and concluding onboarding. You'll set up 3 initial meetings

Customer Uploaded Media

1. Your Drive will come with these preset folders:

a. Cut Reels

- i. This folder is for all finished videos for reels, our team will upload content here to feed the AI, if you have any edited videos you made for reels you can upload them here to throw them into the mix.

b. Submitted Videos

- i. This folder is for long form, uncut videos like long form podcast videos, speeches, promos, etc. Our AI will take this content and chop it into smaller form videos that will do great on reels! These cut versions will find their way into "Cut Reels"

c. Social images

- i. Add as many images as you want here, our AI will use them to build out your custom social posts and personal images are always more effective than stock!

d. Results

- i. This folder is paramount for your success, the more screenshots of your customer results such as reviews, texts, case studies, you can upload here the better this AI model will work for you.

Customer Timelines & Expectations

Our team will schedule out in advanced your onboarding and review calls so that they're on your calendar ready to go! Here's what our production timeline looks like...

Day 1: Welcome to the Adventure! Start your Onboarding Form.

Day 2: Finish your Onboarding Form. Our team will reach out to realign expectations and answer preliminary questions.

Days 3-5: Join us for the Connections Call to connect your social accounts to our system. Your deliverables are almost ready, so our team will answer any questions before the deliverable call.

Days 5-6: Join us for the Delivery & Edits Call, so we can present what we've produced and gather your feedback.

Days 5-9: Our team finishes final touches.

Day 10: Join us for the Success Day call which is designed to get your deliverables launched and ready to go!

Weeks 3-4: Join us for your Optimization Call to review results and work through strategies. We will also connect your Meta Ads to begin your retargeting campaign.

Months 2-3: You will hit your first million in reach within the first 120 days, once this snowball is rolling down the hill, it's hard to stop! Expect an average of 1 million in reach per month after the first 120 days.

Responses For Edit Requests We Do Not Do

*****HOW SHOULD YOU REPLY TO CUSTOMERS WHEN THE REQUEST IS NOT IN A GENESIS PRODUCT SET BUT AN ODYSSEY SOLUTION*****

Process: Add the response below AND the above specific deliverable description of what we can do.

First Request:

1) We LOVE the ideas! On this plan though- in order to get you RESULTS and get them fast- we aren't able to do super custom work. Every piece we have on the Genesis is streamlined and specially designed to get you results, reach and audience quickly. If you need more custom work we have addons that allow for more TLC: time, love and customization.

I would be happy to connect you with our Odyssey team so you can learn more. When would be a good time?

[Send Odyssey sales team Calendly link]

Second Request: Thank you for your request! The changes you're looking for fall outside the scope of our Genesis Package. We offer a more customized solution with our Odyssey Package, which might be a perfect fit for your needs. Odyssey includes fully customized websites, multiple eBooks, more extensive social media management, and access to an AI chatbot a personal consultant. Plus, it guarantees a reach of 5-10 million for your business. I can have a team member reach out to you to discuss this further. Their calendar link is below- set up a meeting with them so we can find out the best way to help your business.

[Send Odyssey sales team Calendly link]

Third Request: Hello again! I appreciate your enthusiasm for making improvements. As mentioned before, the changes you're requesting are not included in the Genesis Package. The Odyssey Package offers the level of customization you're looking for, including advanced

website features, eBooks, social media, and an AI chatbot. It's designed to provide significant value and reach. Let me know if you'd like more details about the Odyssey Package or if we can arrange a time to discuss it further.

Fourth Request: Hi! I understand the need for these adjustments, but our Genesis Package is streamlined to provide quick, effective results within a defined scope. For the custom work you're seeking, the Odyssey Package is your best option. It includes extensive custom features and guaranteed audience reach. We've designed the Genesis Package to get you foundational results quickly, but upgrading to Odyssey would be necessary for these additional requests. Would you like to move forward with a discussion on how Odyssey can meet your needs?

Other Info that Goes to the Client on Deliverables

Email Series (Intro to the Email Delivery Doc that goes to the client for approval)

We created this 24-day email series to systematically nurture leads by offering valuable, engaging content that highlights your mission and services, setting the stage for increased brand visibility and engagement. Please note that the length, topics, and subjects were chosen intentionally and have been optimized for the highest audience interaction and open rates and to not bombard your audience.

This document contains only the text portion of the series. Our team will be manually adding each email to an automated Mailchimp campaign, with your logo and links to your website.

Please check it for accuracy and

- If you have specific wording changes you'd like, **please make edits directly in the document.**
- The team will need those **by the end of the day or next business day**, in order to keep our deliverable timeframe.
- If we do not hear otherwise, we'll assume the emails were accurate and you don't need any changes and begin adding these to your Mailchimp account.
- **At that point edits can no longer be made.**

If you don't have time to review, no problem at all as we know you are incredibly busy running your amazing company. In that case, don't worry about responding and we'll preview as best we can for accuracy based on what our team knows about your company.

Please note, no need to send login info for mailchimp. If you already have a mailchimp account, let us know the email you used, otherwise we'll use the email we have on file for you. You'll receive a mailchimp invite from our team, click on it and accept that invite. Instructions [here](#)

(scroll to the mailchimp section). **Select a Standard or Premium Plan and set us as Manager (or Admin** depending on the plan you choose). This allows us to post the series on your behalf and start increasing your audience. We cannot begin automating your series in your mailchimp (nor can we set up the lead magnet email linked to your HCP to build your audience), without mailchimp access.

Mailchimp (Invitation that gets sent to the client by the Automations Department)

To kickstart the creation of your email series and audience journey, we kindly ask you to set up your Mailchimp account and grant us access. This will enable us to efficiently manage and tailor your email campaigns. We will also need access to your account to automate your eBook and email series.

Please follow these steps:

1. Create a Mailchimp Account: If you don't already have one, sign up here > <https://mailchimp.com/signup/>
2. Choose between Standard or Premium plan, depending on the number of leads you might have.
3. Grant Access: Navigate to your account settings and add me as a user with the necessary permissions.

We appreciate your prompt attention to this request and look forward to collaborating with you on your email marketing strategy!

Internal Policies- NOT customer facing information

Data we show beginning customers

If customers ask for their results within the first month AFTER deliverables are created and pieces are published and running.

- We do NOT show google analytic data until it looks impressive
- Instead we show social media reach through Impressions.
 - This can be show with the impressions on 1 viral post AND/OR the total reach.
 - Adjust the dates (last week, last 2 weeks, last month) to have it be the most favorable the first time, in a time frame that makes sense.
 - IMPORTANT: (when getting from Sprout) Always change your window size so the screenshot shows the dates and the Impressions only (not engagements or any other data). And have ALL their accounts selected (facebook & instagram & linkedin if applicable to give one total impression number)

- If the reach is not impressive get Madelyn to put Rashawn on it asap and get it high by end of day or next day

Breakdown (with visual metrics and data) of keywords and SEO. What have they been doing and what we plan to do to improve their ranking?

This comes from Ahrefs data. You can set up a meeting with you, Angel, whoever does keywords, Tom, and Eden and I can train you in it? It would be part of the Optimization meeting that they will need to know how to pull it and how to explain and discuss it.

View lead nurture metrics, open rates, conversions etc. ? You get this from Kaye in Automations. She should know how to screenshot it, and again this is part of the optimization meeting. you, angel, kaye, tom & eden can be trained in this if you'd like to set something up?

We do not show if not optimal

Clients that have Mailchimp audience larger than 100,000 will need two accounts because that's the max audience per account. Does that change anything on their subscription level?

1) I'd have them look into a custom plan as it'll be far cheaper than 2 of the high end ones. Mailchimp: "If you want to store more than 200,000 contacts, let us know and we'll customize a plan for you."

2) The thing I'd discuss with them though is mailchimp and our systems are intended to be front end- ie not to necessarily nurture existing audience, and definitely not optimal for cold leads (as that's a completely different strategy). It's optimized to nurture the audience that comes from our set funnel. In this case, that would decrease their mailchimp cost CONSIDERABLY as they'd only need the \$20/month standard plan for awhile (up until 500 contacts).

3) The real gold of their lists though (if they aren't cold email lists) is they can use email lists for Facebook retargeting. This process is known as creating a "Custom Audience" on Facebook. Here's how it works:

- Upload Email List: You upload your email list (usually in CSV or TXT format) to Facebook Ads Manager.
- Match Process: Facebook matches the email addresses from your list to its user base. If a user's email in your list matches the email they use for their Facebook account, they'll be included in the custom audience.
- Create Remarketing Campaigns: Once your custom audience is created, you can run targeted ads on Facebook (and Instagram) specifically to those users, helping you re-engage with people who are already familiar with your brand.

This strategy is especially effective for retargeting past customers, nurturing leads, or upselling to an existing audience.

I'd direct them towards using their lists in this way, not necessarily putting into their mailchimp account?
